

SUMMARY

While working as a structural engineer in this past year, I was introduced to programming by a friend. I've always been curious about web development but after taking some online classes I was officially hooked. Not only it was intellectually stimulating but it was the first time I found myself doing something I loved.

Since being introduced to programming I have taken some online classes and registered to a bootcamp that I'm still a part of. I'm looking forward to learning more and apply classroom knowledge in a real-world professional environment.

TECHNICAL SKILLS

HTML, CSS3, Sass, Bootstrap, JavaScript, ReactJS, MySQL,

WORK EXPERIENCE

Hostess Jun '17 - Oct '17
The Red Mill Vergennes, United States

Welcomed guests in a warm and friendly manner. Monitored restaurant activity to determine seating and dining flow.

Structural Design Engineer Oct '20 - Apr '22
Building shpk Prishtine, Kosove

I was responsible for designing structures such as buildings and creating structural models by using computer-aided design software. Providing advice and resolving creatively any emerging problems/deficiencies. I left only to pursue my passion in web development.
